DETAILED ACTION

Finality

The finality of the previous office action dated 11/17/2006 has been withdrawn.
Further rejections on the merits follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 7, 16-19, 25, 27-28, 33, and 52-62 rejected under 35 U.S.C. 102(b) as being anticipated by Coates et al. (US Patent 5,423,826). Coates et al. disclose a guide device for guiding a drill and/or plate comprising an elongate shaft (See Fig. 14, elongate central portion that splits) that has a proximal and distal end and a varying width, a guide member (157) attached to the distal end of the shaft that also includes two lumens (158, on both sides, wherein the guide member at the distal end is considered one unit), opposing alignment tabs (161), and also wherein the lumens (158) are between the alignment tabs, and wherein the tabs and guide device are capable of non-fixedly attaching to a plate and also wherein the aligns with a corresponding hole in the plate (see paragraph 2, see lines 35-43). The lumens are also positioned with respect to one another (Col. 2, lines 30-40), and wherein the barrels (180) to aid in guidance are angled with respect to one another (see fig. 19) through the lumens (158).

Response to Arguments

Applicant's arguments with respect to claims 1, 3, 7, 16-19, 25, 27-28, 33, and 52-62 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
